Electronic Welding - selection of modern welders

Once upon a time welder body 'dominant' market of Vietnam, is the first choice of the welder. However, the pace of industrialization, urbanization strong with the continuous high-rise buildings springing up, the engine welder revealed weaknesses such as heavy, laborious transportation, special especially dangerous when working overhead.

Moreover, this old-type devices consume a lot of power, can affect the electrical system when used, can cause unwanted accidents.

With the development in technology welding, the welder can now find an alternative safe welding machine handy with electronics.

Up to 9 Advantages help electronic welders 'outperform' welding machines often:

The compact design, light weight, easy to store.

Flexibility in moving and shipping: widely used, can be applied to work at height, field work, decorative indoor and outdoor ...

Cheaper machine body

Beautiful welds, applied to a variety of welding materials

Saving power: using high-performance, no-load capacity of small, thus saving energy.

Stable performance, can operate continuously without causing electromagnetic noise, stable arc, little sparks admit, mellow, easy to control

Installation is simple and easy to use.

It can be used where low voltage

High safety: automatic circuit breaker overload, shock resistant ...

With many advantages such, electronic welding machine is increasingly the first choice of the modern welders.

However, the reality in recent years in Vietnam, electronic welding machine market is more complicated: many brands appearing unknown origin, unfair competition, companies do not address , definitive purchase, quality and sales policy is not clear ...

So, what's the most practical modern welder is wise to choose their brand of electronic welding machine prestigious business address clearly, commitment to quality and after sales from the production - distributors ...
